

OIL SPONGE

BRPA

Bio-remedial premium absorbent which holds up to 8 times more oil based products than DE or clay aggregate.

Action

Oil Sponge is suitable for the removal by absorption of a wide range of hydrocarbons from Acetone to Xylenes, plus blood, cooking oils, juices, milk, soda, tea and coffee.

Application

Oil Sponge is suitable for manual application and should be finely applied across the whole surface area of the spill. Brush and agitate to ensure encapsulation of ALL liquid then remove.

Composition

Oil Sponge is a natural agricultural bi-product containing 106 billion microbes per 1.5 ft³ bag.

Safety

Avoid inhalation of dust.
Users should wear protective clothing.
Keep out of reach of children.
See Health & Safety Data Sheets for full details.

Notes

Oil Sponge repels water. It is bio-degradable or can be incinerated. Large spills could require more than one application.
